Endura-Nylon U.S. Flags with SolarMax[®] Technology

AN AMERICAN TRADITION

We use...

SolarMax[®]

...For all nylon flags in this catalog.

A SUPERIOR NYLON FLAG FABRIC SECOND TO NONE

Strength. Durability. Visibility. SolarMax[®] fabrics are tough, durable, long-lasting and specifically designed for active outdoor use. SolarMax[®] fabrics exhibit tremendous strength retention under UV exposure as well as world-class tensile and tear strength. Because of its strength SolarMax[®] fabrics will increase overall performance. SolarMax[®] fabrics are highly resistant to UV fading, allowing the use of deeper, brighter colors that will last over time. In addition, SolarMax[®] fabrics offer better washfastness and lightfastness than other nylons of similar fabric construction, so they will retain their good looks long after the competition has called it the day.

SolarMax[®] is a registered trademark of INVISTA for UV resistant fibers and fabrics.

HEADERS

Rope Thimble

12" x 18" - 1" heavy-duty, bright white cotton polyester blend army duck header with two solid brass #1 flat rimmed grommets.

16" x 24" through 5' x 9 1/2' - 1 1/2" heavy-duty, bright white cotton polyester blend army duck header with two solid brass #2 rolled rimmed, tooth washer grommets.

6' x 10' - 2" heavy-duty, bright white cotton polyester blend army duck header with two solid brass #2 rolled rimmed, tooth washer grommets.

8' x 12' - 2" heavy-duty, bright white cotton polyester blend army duck header with #10 white nylon rope sewn into the header. Galvanized thimbles are attached using a triple crimped rope sleeve. The entire length of the rope is sewn into the header to stabilize it's position preventing "bunching" of the header. Additional grommets are spaced evenly throughout the length of the header (see chart at right).

10' x 15' through 15' x 25' - 2" heavy-duty, bright white cotton polyester blend army duck header with #10 white nylon rope sewn into the header. Galvanized thimbles are attached using a triple crimped rope sleeve. The entire length of the rope is sewn into the header to stabilize it's position preventing "bunching" of the header. Additional grommets are spaced evenly throughout the length of the header (see chart at right). 2-ply corner patches are sewn into each header corner.

20' x 30' through 20' x 38' - Two thicknesses of 3" heavy-duty, bright white cotton polyester blend army duck header with #10 white nylon rope sewn into the header. Galvanized thimbles are attached using a triple crimped rope sleeve. The entire length of the rope is sewn into the header to stabilize it's position preventing "bunching" of the header. Additional grommets are spaced evenly throughout the length of the header (see chart at right). 2-ply corner patches are sewn into each header corner.

25' x 40' & Larger - Two thicknesses of 3" heavy-duty, bright white cotton polyester blend army duck header with a double thickness #10 white nylon rope sewn into the header. Galvanized thimbles are attached using a triple crimped rope sleeve. The entire length of the ropes are sewn into the header to stabilize it's position preventing "bunching" of the header. Additional grommets are spaced evenly throughout the length of the header (see chart at right). 2-ply corner patches are sewn into each header corner.

We recommend that all grommets installed in the larger flags be used to secure the flag to the halyard.

How long should a flag last? There is no definite answer to this question. How long any flag will last depends on the weather, its location, airborne contamination and how often you fly your flag. Remember, your flag is a piece of cloth that works very, very hard. Throughout its lifetime your flag shakes, trembles, drapes, snaps, chafes, bakes, freezes, ripples, flutters, furls, twists, flaps, strains, flies, unfurls and hangs! Is it any wonder that a flag that flies continuously needs replacing two or three times a year? Wind, water, sun and carelessness are the major enemies of a flag. No one can control the weather but you can take some important steps to lengthen the life of your flag. Occasionally washing your flag in warm detergent water will prevent pollutants and dirt from weakening the fabric. Always let your flag dry thoroughly before storing it to prevent mildew or color transfer. At the first sign of fraying, have your flag repaired before further damage is done. Always keep your flagpole as clean as possible and move your pole if your flag does not have adequate room to fly unobstructed.

ENDURA-POLY™ U.S. OUTDOOR FLAGS

Typically, indoor flag sets are shipped in two cartons as standard. One carton for the pole and one carton for all of the other components. We now offer a box that will accommodate either one or two complete sets. You may add the pricing at the left to any flag set that has a 7' or 8' pole and we will pre-package your set or sets and ship as one unit. Any of our flags including State, Foreign, Military or Custom can be substituted for any flag that is supplied with our standard sets; contact us for a prompt quotation. Please note that the photographs above show the accessories unwrapped. For added protection all of the accessories are either additionally boxed or wrapped in heavy-duty Kraft shipping paper before being packaged in the Flag Set Box.
